	Autumn 1	Autumn 2	Spring 1		Summer 1	Summer 2
MUSIC	Blues / Rock 'n' Roll: Improvising and musical dialogue	Reggae: Understanding Syncopation	How to do more with less: Composition using rhythms	Songwriting Basics	In at the Deep End 1	
DEVELOPING	Listen to the work of Robert Johnson 7 BB King to get an idea of how the blues should sound.	Listen to the album Catch A Fire, and identify how the offbeat is utilised and the effect it creates.	Download the 'Clapping Music' app to your phone - it's free! Try it out and see how far you get!	Listen to some of your favourite songs and think about the structure that you can hear. Write it out.	Pick a piece of music that you will realistically be able to learn in the time you have.	
SECURE	Implement some of the musical features you notice into your music. Think about rhythm, speed, and overall atmosphere most.	Implement this within your own music; exploit the staccato effect of the chords for an increased sense of style.	Think about how you can use a short, repeated 'cell' to make something musical. Try starting earlier or later than your partner.	Think about how your own music might develop in a similar way and being to plot out the different ways your song will change	Work completely independently and with a little help from online resources as possible.	
MASTERED	When improvising, try to 'trade' with other musicians and create a conversation between the two of you (or more!)	When performing, try to play with the same mindset you think the prominent reggae players have. Something along the lines of concentrating, but relaxed.	Think carefully about how you can further shift the phasing of your cell to make your music more interesting with a minimal amount of change.	Continually appraise your work and offer it up for appraisal by others.	Work completely independently and with a little help from online resources as possible.
