Dear Parent / Carer

## **Hampshire and Isle of Wight COVID-19 Testing Programme**

We are pleased to share the news that your child's school is taking part in the Hampshire and Isle of Wight COVID-19 Saliva Testing Programme. This test is very simple and involves collecting a sample of saliva in a plastic pot. Free tests will be offered to **all students** and **staff**.

Your child will receive a testing pack on Friday 3 September which contains pots and a leaflet that shows your child how to collect a sample at home, to be dropped off in school.

### **Why is this important?**

Knowing who has COVID-19 is vital to stopping its spread. We hope that you are as excited as we are about the potential for this test to help us manage the risk of COVID-19. Alongside all the other measures we are taking to control the virus, it could help us to keep our communities safe and well and keep our schools open. While this testing is not compulsory, I would urge all of you to take part.

### **How will the testing work?**

We will be working with the students, using specially developed resources, in school on the days before they take their tests so they can learn about how the test works and how regular testing can help keep them and their community safer.

You can access these resources to use at home by going to the 'Student' section of this website: [www.lifelabonline.org](http://www.lifelabonline.org)

Students will then bring their test kit and labels home from school when they attend for lateral flow testing before their first test as well as a leaflet giving step by step instructions. They will be given enough sample pots and labels for eight weeks of testing. **It is important that your child takes the test when they wake up - before they have anything to eat or drink and before they brush their teeth.**

Once the sample has been labelled and bagged, your child will need to bring it to school with them and put it into the big collection box at the entrance as they enter the college site. The tests will be collected and taken to the test centre on the same day. Test results will be returned in the next 24-48 hours and you will receive a text message telling you the result of your child's test.

If your child tests positive, everyone in the household must start isolating immediately. The programme team will contact you and ensure you get the help and advice you need. Please note that this test is for testing children who do not have symptoms of COVID-19. If your child

does have COVID-19 symptoms they should not attend school and you should order a test through 111.nhs.uk or by calling 119.

If your child is absent from school or forgets to bring in their test, they can bring it in on the next collection day – their teacher will tell them where to take their sample pot. The school will have some spare packs to hand out to anyone who loses their sample pots but we would encourage you to keep them somewhere safe as spares are limited.

### **Important information about your data**

To enable the partnership running the COVID-19 Testing Programme between University Hospital Southampton, local government, and the University of Southampton to deploy the test kits to the school and to manage the collection of samples from schools, our school will be sharing contact details of pupils and their parents or guardians, as well as staff, with University Hospital Southampton NHS Foundation Trust.

As you know from our school's [Privacy Notice](#) we are very serious about protecting the personal data of all members of our school community, and we will maintain this approach in relation to this data sharing. We will only be sharing limited contact details. The NHS will share confidentially with nominated senior leadership within the School positive test results to enable immediate initiation of contact tracing to minimise the risk of the virus spreading.

The Privacy Notice for this COVID-19 Testing Programme has been included with this letter. Please do take the time to read this. If you have any questions or would like to exercise your right to object to this data sharing, please call the contact centre on the number below.

You should find answers to any questions on the testing programme on [www.hiowsalivatest.nhs.uk](http://www.hiowsalivatest.nhs.uk) where there is also a web chat service. Alternatively, you can call the contact centre on **0808 196 2282** (lines are open Monday to Friday 8.30am to 5.00pm).

Yours sincerely

Ms C Cubbage  
Principal
