Dear Parent/Carer

Year 10 Separate Science Course

Following a review of your child's academic performance and potential in science, we are pleased to inform you that they have been selected to follow the GCSE Separate Science course.

The AQA Separate Science course is an academic pathway designed to provide students with a more in-depth and specialised understanding of Biology, Chemistry, and Physics. Below are some key points about the course and what it means for your child:

- **Specialised Curriculum:** Your child will follow a curriculum that extends beyond the Combined Science course. It includes more advanced topics, practical experiments, and projects to deepen their understanding of each scientific discipline.
- **Three Separate GCSEs:** Upon successful completion of the course, your child will be awarded three separate GCSEs—one each in Biology, Chemistry, and Physics.

We believe that your child's participation in this course will be both rewarding and enriching, offering a strong foundation for further study in science.

If you have any questions or would like more information, please do not hesitate to contact me.

Mr M Rake
Head of Faculty - Science and PE
